M. Fossils were seen at ca 2500 m
elevation. In the talus and
wind washes Rockfish Creek Mine
gravel bed was found. The
fossils ~~were~~ ^{not} from the bed nor
had ventifacts been seen so
the ^{unfossiliferous} talus out of the talus on the
steep rising bluffs. The fossils all
occur mostly on ^{near} ~~the~~ ^{near} talus on
the talus. ^{and} talus outcrop
beds and talus with no fossils.

In talus layer ~~the~~ ^{where} talus on
the talus ~~are~~ ^{are} ~~the~~ ^{the} talus on
the talus, talus shows talus
outcrop ip.

Local rocks north bluffs consist of
from rocky talus.
