

Danger Level 3 - Considerable

Tendency: Increasing avalanche danger
on Sunday 20 October 2024

Gliding snow

2600m

Frequency: **some**

Avalanche size: **medium**

On sunny slopes an unfavourable avalanche situation will persist in some regions.

Gliding avalanches and wet snow slides are to be expected even now.

Snowpack

Danger patterns

dp.2: gliding snow

The snowpack is wet all the way through.

Tendency

In all regions the prevalence and size of the avalanche prone locations will increase.
